

1. Dog in interior hallway looks longingly at running shoes

2. The owner and dog exit shot

3. A close up of a runner on a country trail

4. Medium close up of the runner's face approaching camera

5. Cut to a profile shot revealing scenery - trees, mountains, golden light

6. Shot of training shoes splashing through a stream

7. Cut to following shot

8. Runner on a lake shore

9. Cut to a drone shot rising above the runner

10. we see her approaching her vehicle

11. Cut to silhouetted profile shot of the vehicle as it begins to pull off

12. Final Interior of dog looking up a tree canopy through sunroof

TO COMBINE
POLYETHELENE

1. Black suited skydiver in from right of frame - wide shot

2. Grey suited skydiver flies in opposite direction from left of frame

AND POLYPROPELENE

3. POV shot from black suited skydiver (GoPro style shot) as the grey suited guy approaches

ISN'T EASY

4. Side on wide shot as the two meet and bounce off each other instead of connecting - somersaulting away

BUT IMERPLAST
MAKES IT HAPPEN

5. Bright (yellow?) suited skydiver appears in shot, expertly in control he or she gets into position

6. Wider shot - The other two skydivers approach - all arms open

7. They connect - close up shots of hands etc

8. Cut to mid shots of the 3 skydivers rotating together happily

9. Cut to wider shot of the three skydivers from above

10. Cut to final wide top shot showing the group we have established plus one more identically dressed group to get across the idea the ImerPlast makes multiple connections possible.
